2022

Regions

Bari, Karkaar, Nugaal, Mudug

Districts

Bossaso, Gardo, Garowe, Galkio

1. INTRODUCTION

The GF grant proposal for 2021 – 2023 continues with prevention and testing uptake focus on people most at risk for HIV while also targeting vulnerable persons (uniformed personnel, IDPs, prisoners, young people and emerging vulnerable populations) and ensuring retention in care for PLHIV. Outreach has been found to be the most effective modality to reach these populations as they are often hidden or may not have consistent health seeking behaviour.

While the programme started under the current grant as a peer education programme, it was found during a self-assessment in January 2020 that the peers were often not peers, with the exception of the PLHIV PE. Implementation under the new grant will start with a revised training manual and training for Outreach Workers (no longer peers for vulnerable populations) to reach populations most at risk for HIV and Case Workers (still PLHIV) to reach PLHIV and their families.

Incentives have been increased with the expectation that literate, educated persons will be selected for this work and that the quality of the work, referrals, and reporting will increase. Community Conversations, an outreach discussion modality, will be used to reach vulnerable populations uniformed personnel, IDPs, prisoners, young people and emerging vulnerable populations. Community Conversation will follow a prescribed module depending on the target population. At the same time, reaching PLHIV with peers is proven to be an effective means of retaining PLHIV in treatment. The project will place PLHIV as case managers at ART facilities, and Mother Peers, women living with HIV who have gone through PMTCT to link women testing HIV positive in pregnancy to ART services and women of reproductive age to HIV testing.

To reinforce clinical support to PLHIV, the project will run a PLHIV Network which will run support groups through the case managers. Support groups will initially be held after hours at the ART centres, subject to acceptability of PLHIV and health staff. The Network will provide cash transfers for nutritional support, provide referrals, and liaise with the AIDS Commissions to provide further legal, redress and other support.

The project will work with client groups to code sign a drop-in centre at the applicant NGO's office with different days expected to be allocated to different population groups. The drop in centres will also be able to be used for broader health and social development programs where appropriate.

Quarter 2 Started from April, May, June, 2022 that we covered in all activities to be implemented during quarter two of this HIV Prevention and case management programme in all detailed activities for the following,

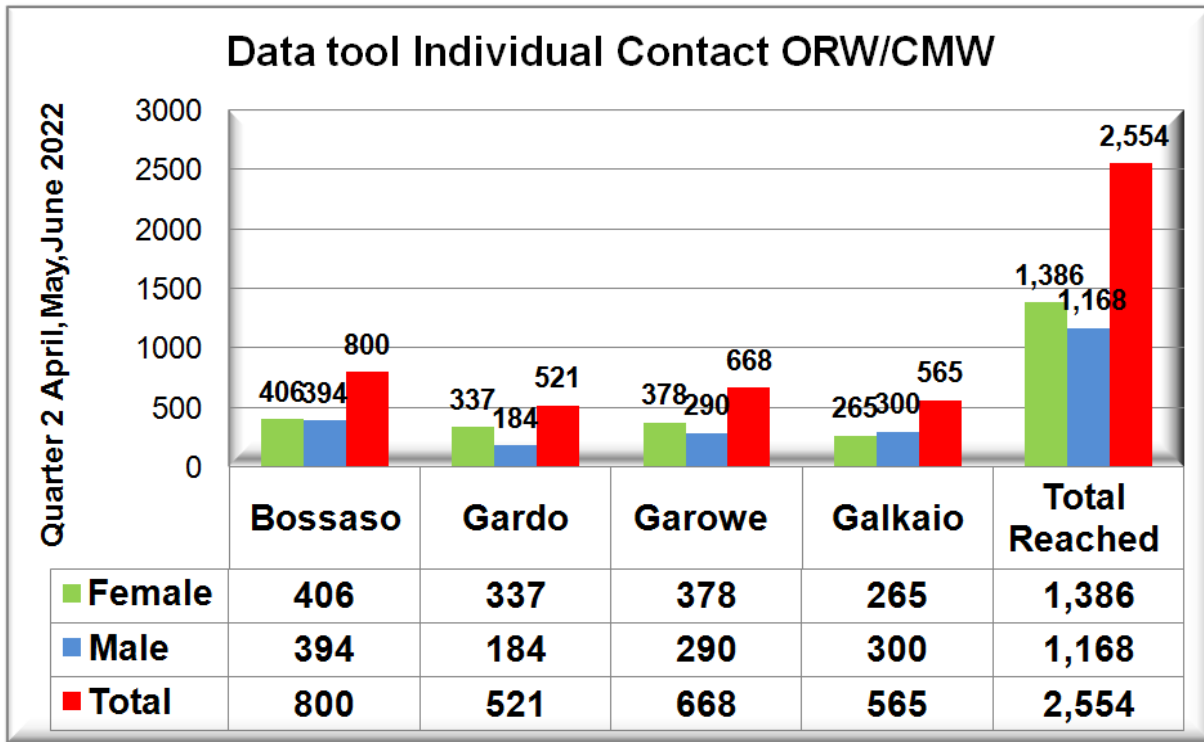

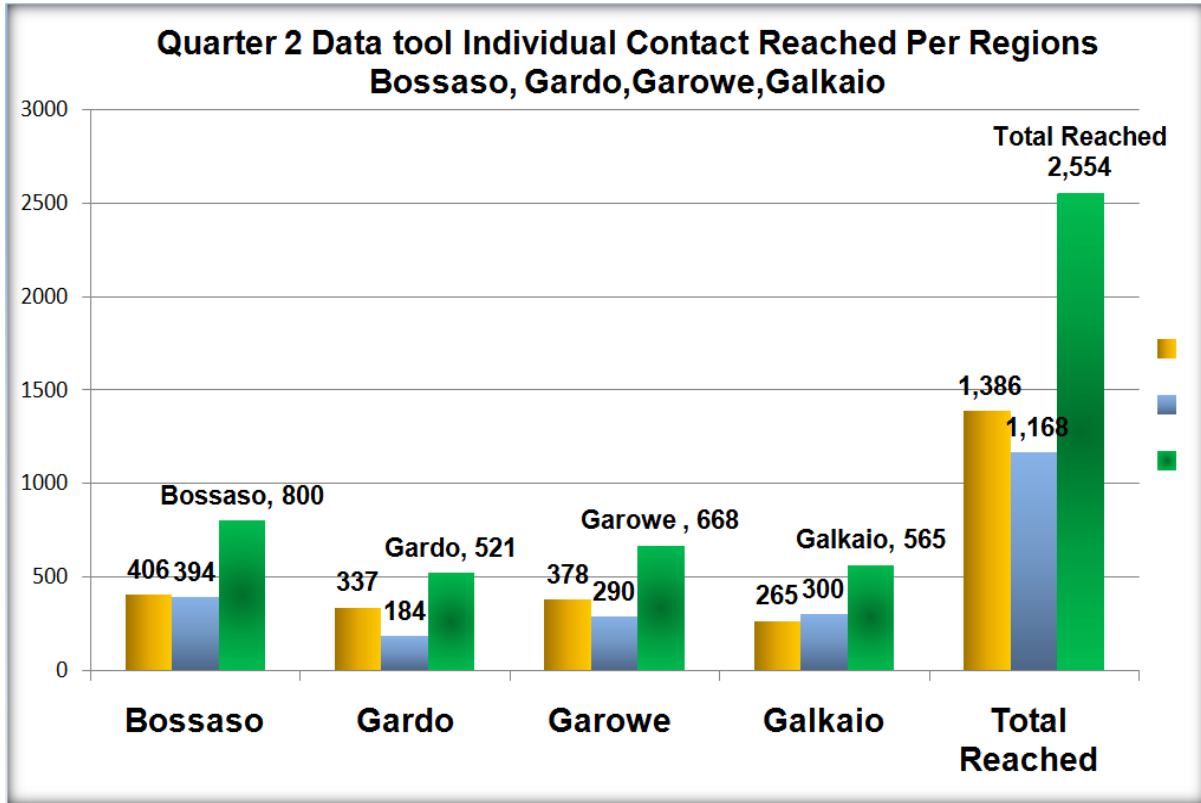

2. ACTIVITIES NARRATIVE REPORT (quarter results against targets)

Peer Educators in Puntland are 31 Outreach workers and case management workers who will support key vulnerable populations and PLHIVs in four districts of Puntland (Nor East Zone of Somalia) which provided HIV prevention and care programme to key vulnerable population and PLHIV in Puntland and delivery mechanism of these services including referral mechanism to other service providers outreach workers and case managers needed to help client prevent HIV infection and support clients to test for HIV and supporting people living with HIV/AIDS mitigation and reduction project aimed at key vulnerable populations and PLHIV funded by UNICEF(Global Fund) and implementing ISDP.

Peer educators effectively working with different in all 4 regions in Puntland such as Bossaso, Gardo, Garowe, Galkaio, ORW/CMW which was provided data tools individual contact report designed of specific activity to provide information about the form 10 to be filled through individual contact according to the personal status of giving HIV awareness information's, GF HIV Prevention and care program of the new grant of 2021 up to 2023, ORW/CMW through using data tool report which they collect information and providing ICE/BCC Materials as per individual contact both male and female specially targeting the key vulnerable population which is most at risk in population in the society, Outreach worker and Case management worker normally working as per to be reached 30 clients per month specially ORW where by CMW/Mentor to be reported according to their availability that how many people they deal with either LFU, ART adherence, and etc, whereby ORW in each day will be contacting one person average of **Data Tool Individual contact** with different types of clients such PLHIV, PLHIV Family member, Vulnerable Women, Vulnerable men, Authorities UP and Police, PWID/Drug Users, Transport Workers, Port Workers, hat/substance Users, and others. HIV/AIDS awareness ICE/BCC brochures will be provided after giving HIV awareness sessions given HIV Prevention, Testing, ART, PMTCT&Infant Testing, GBV&PEP, Drug Use, Stigma&Discrimination, Rights, Positive Living, Partner/Child Testing, CD4 and VL, Nutrition, ART Adherence and others, **Data tool individual contact collecting** end of the month will making Monthly summary individual ORW/CMW Report with age disaggregation both Female and male indicated client by District.

Group contact HIV awareness as a team work HIV community Mobilization sessions: to be reached with different community sectors such as IDPS, young people and others, giving counseling and testing such as Group pre-test counseling, this quarter two we targeted IDPS which are most at risk population **The total reached 102 Female and male 60 in all over total were reached 162 of HIV awareness as a group contact through campaign in all regions for this quarter two 2022.**

Individual Data tool report were reached the female were 1,386 and 1,168.in all total reached 2,554 people in all four regions

Activity 1.1.1 PLHIV Support Groups Monthly Meeting

HIV Prevention and care management project activities included of PLHIV support group monthly meeting which will be held on in all 4 regions in Puntland, Somalia such as Bossaso, Gardo, Garowe, Galkaio monthly based to be implemented in all region,

PLHIV Support group monthly meeting is a new program of this HIV Prevention and care management programme supports as psychosocial support come and share their ideas of people living with HIV, also PLHIV support group people living with HIV who come together and share experiences and case studies and talk about their challenges, experiences that they have in common with their same status and mutual goal, PLHIV Support group meeting increased the impact of their willingness and ability to adhere to their antiretroviral medications if they do not get any kind of support people living with HIV need emotional, spiritual, psychosocial, social and clinical and adherence support,

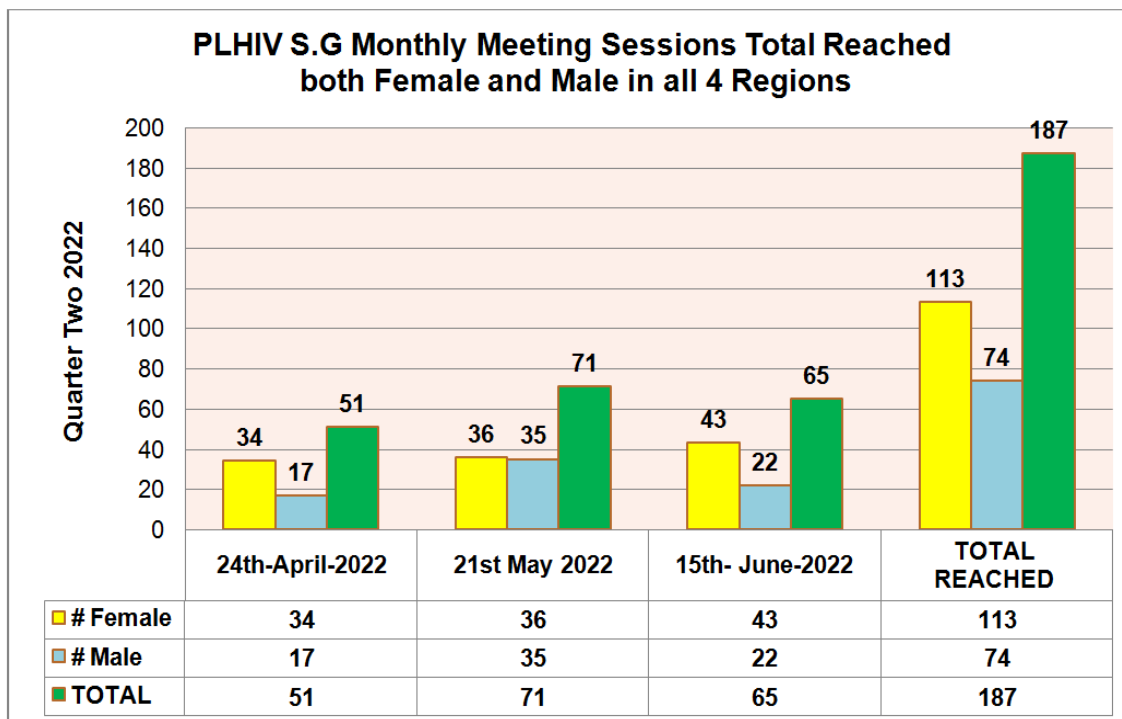

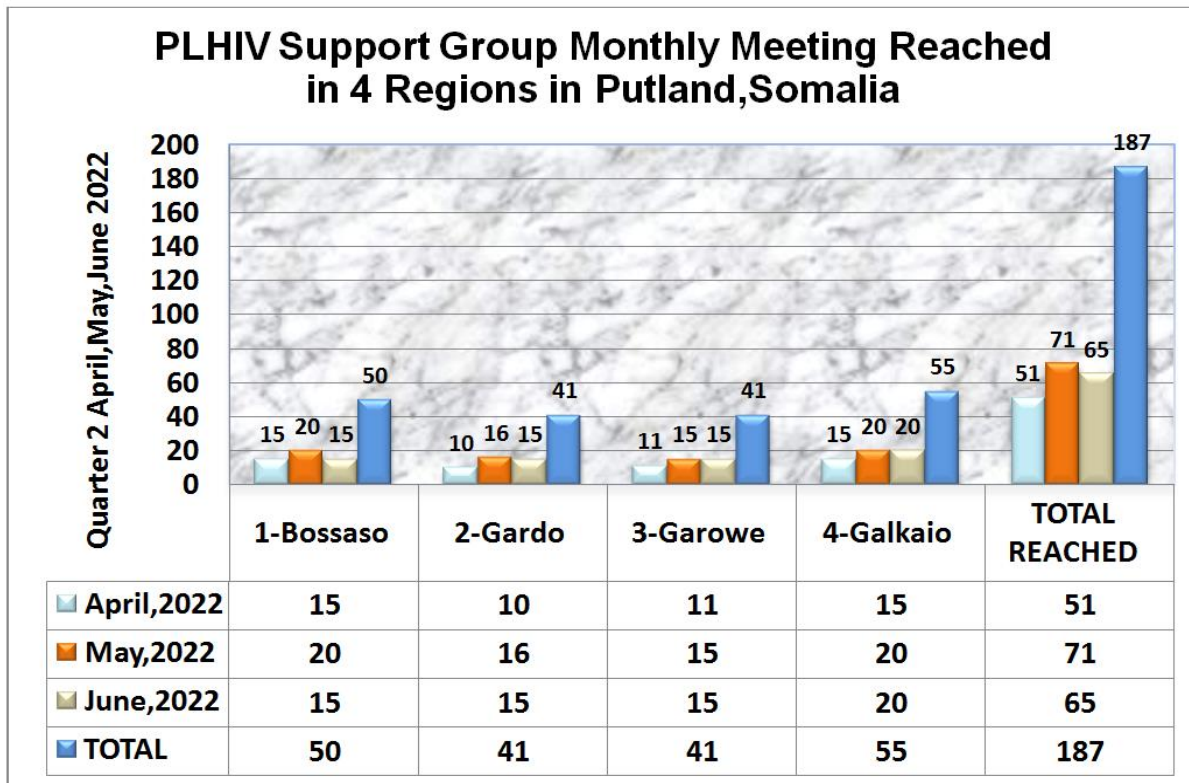

Since we started of this HIV Prevention and Care management project implementation included activities of PLHIV Support group monthly meeting benefited of people living with HIV realised that they are not alone in their situation and receiving guidance, counselling support to handle HIV related stigma, also getting with referral support for legal aid, social protection, healthcare, etc.

PLHIV Support group monthly meeting had changed lives of people receiving first hand advice and other approaches that they learn come from peers who are coping with very similar circumstances, sharing problems and concerns, brainstorm solutions,

PLHIV Support Group monthly meeting held in all regions with pre-planned as quarterly activities included with concern and arrangement of ART doctors and VCT counsellors of preparations and organizing people living with HIV registered ART Centre those needed psychosocial support of people living with HIV of participating PLHIV support group monthly meeting which is designed and facilitating meeting with PLHIV peer educators and case management worker which is well trained collaborating with concern of ART Doctors and their VCT counsellors encouraging family disclosure, reducing stigma and discrimination, ART adherence and retention,

PLHIV support group monthly meeting increased the number of client of participation PLHIV support group meeting to be reached per session 20-25 in each session but this quarter two 2022 the meeting increased number of participants attended in all regions,

Quarter two 2022 PLHIV Support Group Monthly Meeting the total clients reached 187 the female were 113 and male were 74 clients of people living with HIV which is registered with the regional ART centres.

Activity 1.1.2. Community Conversations Enhancement 9 CCE Sessions

*CCE dialogue sessions take place in every mid of the quarter and in each quarter were targeted with different targeted group such as prisoners and **uniformed personal**, barracks, police stations, University students IDPs camps etc, in this quarter two we are targeting Uniformed Personnel we planned the sessions which can be reached with different regions to be reached in each sessions of community conversation enhancement CCE will be reached maximum number in each session per 40 participants in location of **Uniformed Personnel Police in each region.***

According to the scheduled of CCE sessions per region which is took place on this quarter two 2022 HIV/AIDS awareness Police stations with different regions in Puntland such as 3 sessions in Bossaso, 3 sessions Garowe, 2 sessions Galkaio, 1 session Gardo, during implementation of this quarter two 2022 took part in all 4 regional M&E PAC commission supervision how we reach through the target group of Community Conversation Enhancement Dialog which occurs quarterly based on with reaching with different sectors of society to give HIV/AIDS so we selected and realized that Uniformed Personnel Police which one of the Key vulnerable population or risk group are most at risk population and they needed more awareness of HIV/AIDS knowledge.

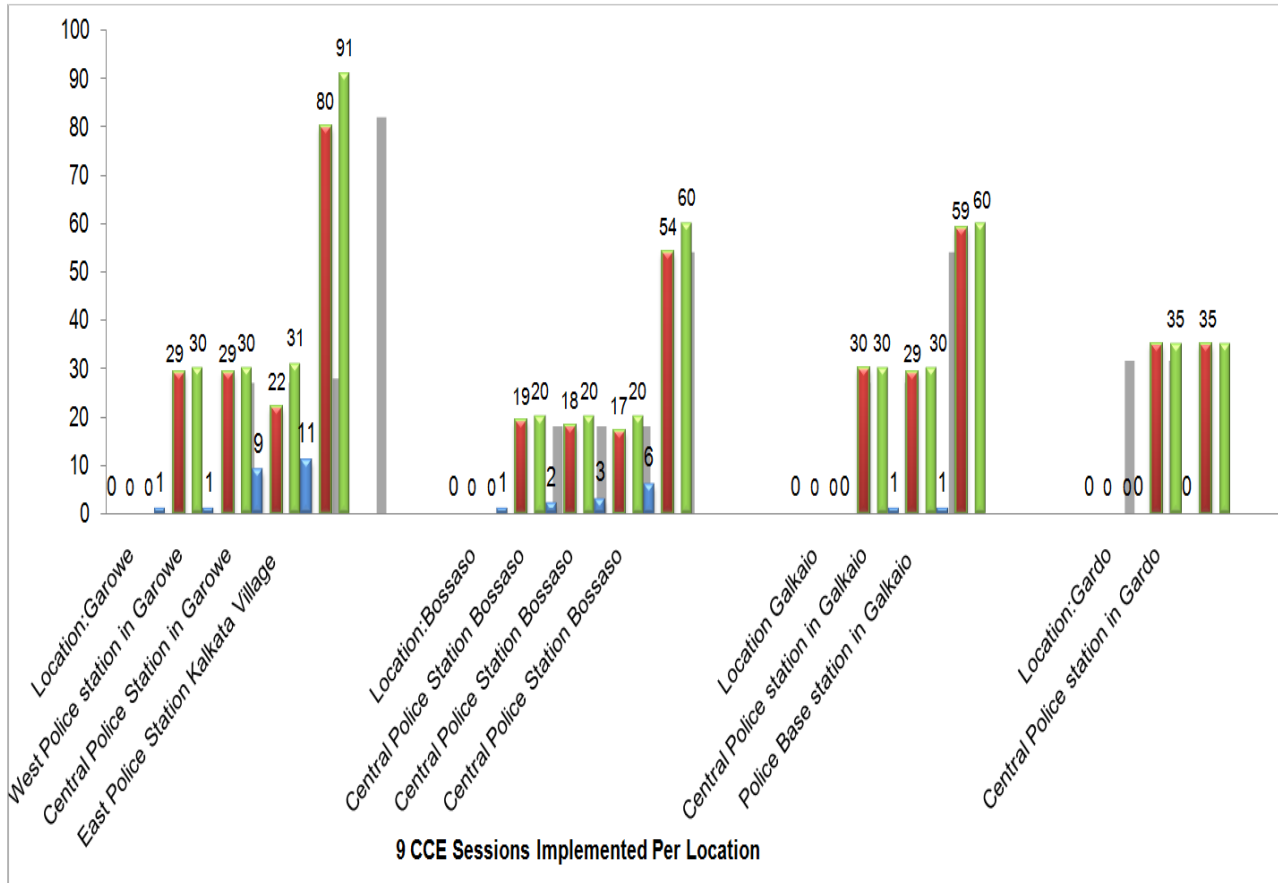

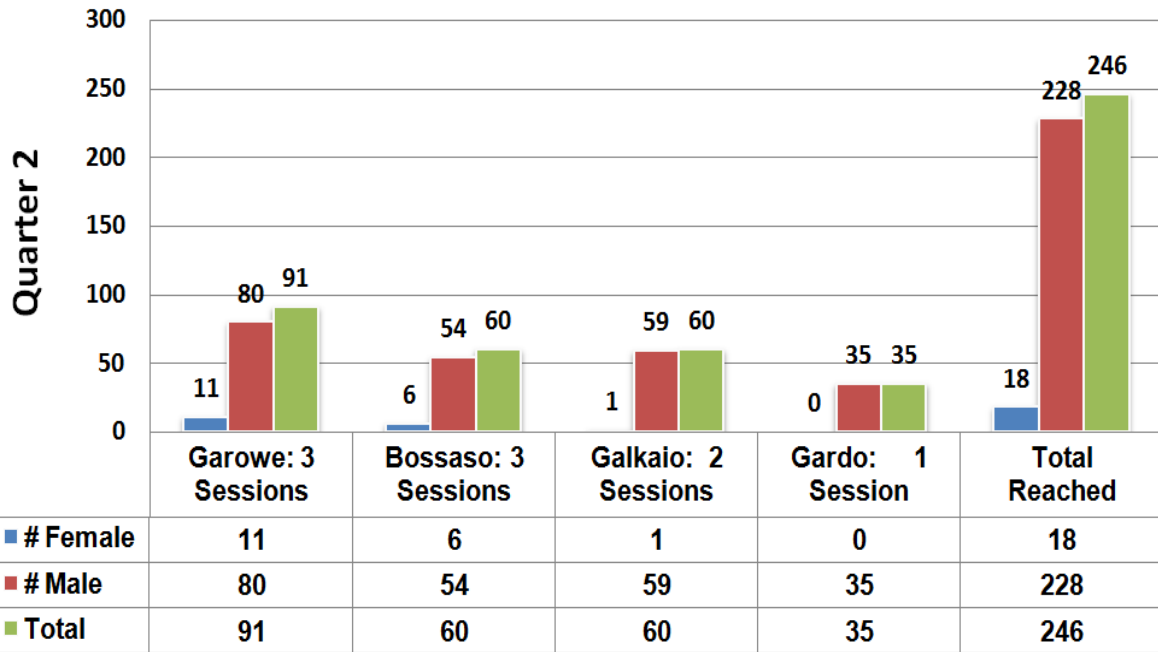

Especially the 3 CCE Sessions in Garowe part taking chairperson of Daryeel Network and also leading person and facilitated by the PLHIV Coordinator Mr Abdirahman Awmuse, in Garowe we targeted the Central Police station. East police station Kalkata, west border police station,

*CCE Sessions requires preliminary agreement and support of the Police Commanders in that Police station for authorization of giving CCE session in the Police department of HIV Awareness accessed providing health services to support HIV testing and counselling. The role of Uniformed Personnel is controlling the HIV Epidemic we are all aware that HIV/AIDS that had no cure, but as we all know that the uniformed forces have capacity to manage with fighting HIV by using effective command structure to reduce the risk of infection even though factors that can make them vulnerable to HIV to the police and also uniformed personnel forces can play a role of important in the society to fight against HIV/AIDS. According to the scheduled of CCE sessions which is took place on HIV/AIDS awareness Uniformed Personnel with different regions in Puntland such as **3 CCE sessions in Bossaso, 1 CCE session Gardo, 3 CCE sessions Garowe, 2 CCE sessions Galkaio**, during implementation took part in all 4 regional M&E PAC commission supervision how we reach through the target group of Community Conversation Enhancement Dialog which occurs quarterly based on with reaching with different sectors of society to give HIV/AIDS so we selected police stations start with also we realized that IDPS are most at risk population and they needed more awareness,*

9 CCE Sessions planned to reach Uniformed Personnel police station which are the key vulnerable population of HIV/AIDS awareness in each session of community conversation enhancement CCE sessions will be reached between minimum 20 to 35 participants in each session according to availability of police stations is rarely to find in a good number.

The total number reached CCE Sessions with Uniformed Police 246 participants in all four regions 18 Female and 228 Male.

9 CCE Sessions Targeted Uniformed Personnel Police in Puntland, Somalia

Activity 1.1.3. Drop in Centre office Bossaso

Drop in centre is safe space to be used for the facilitation of HIV Prevention and care management of targeting with KVP and PLHIV can easily access and seek services as per their specific needs, but mostly visited clients are Key vulnerable Population and other most at risk population such as Vulnerable women and vulnerable men,

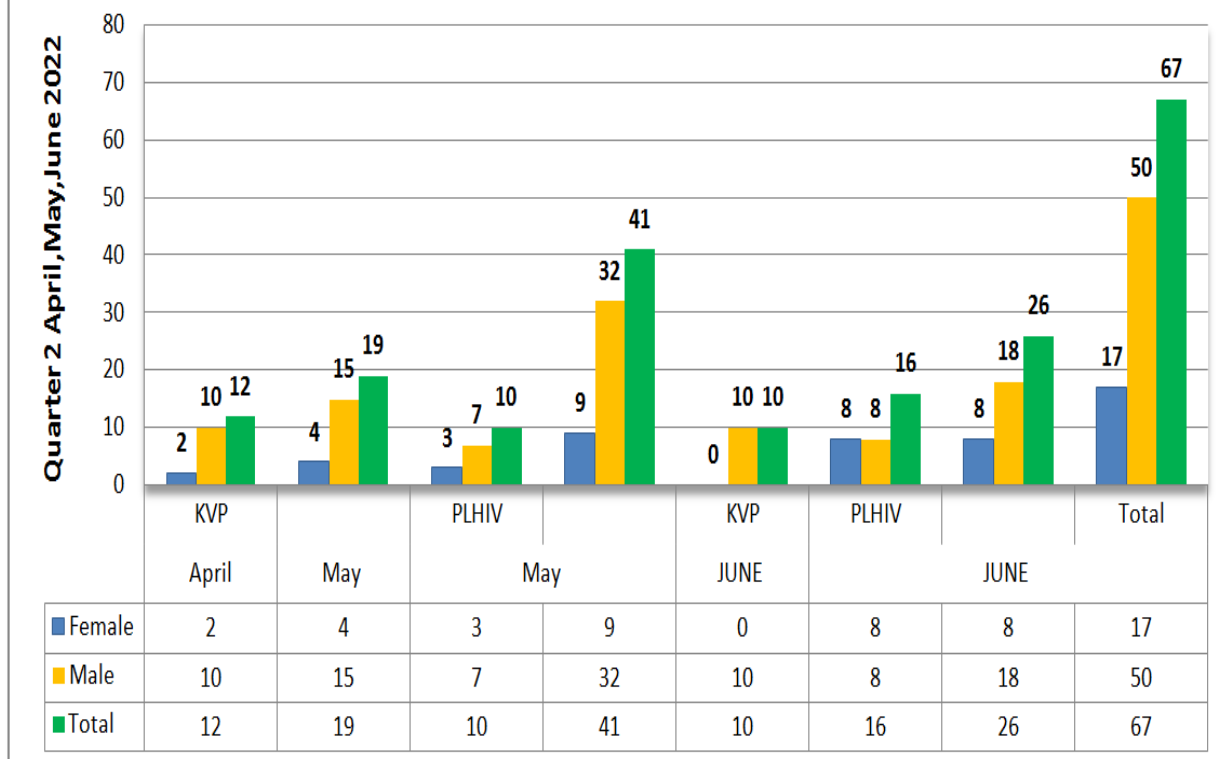

Drop in centre it should be a place where the clients feel secure from potentially threatening person such as the Police, etc and ideally it should be also have premises where services specially STI treatment, could be provided and its accessible with all the necessary facilities conducting project activities a anon threatening place, drop in centre friendly environment,

mainly prevention information sessions and HIV testing for KVP provided and adherence and other psycho-social support for PLHIV, and appropriate referrals from ORW/CMW sending the KVP to the drop in centre. Drop in centre officially operating service delivery mostly with KVP population where by PLHIV clients coming in the drop in centre are less than KVP populations which easily access to seek services of their status Drop in centre Still not adopted well in the society to visit such places to receive guidance and counselling of people living with HIV/AIDS and most at risk populations MARPS and key vulnerable population in the community,

Drop in centre people are getting used move of getting adopted to come in order to receive guidance and counselling services in every each time coming in drop in centre to find service provided those who fear to go VCT and seeking for HTC will be simply and coordinate both VCT and Drop in centre activities. For this Quarter two 2022 has done with in different activities but still had a proper Data tool report and referral into VCT and other service delivery to VCT centre somewhere This quarter two April, May, June 2022 drop in centre activities reached mostly connected to the drop in centre PLHIV those who are taking with monthly Nutrition food in Bossaso receives with the

**Drop in centre Quarter two the total both KVP and PLHIV were 67 people were
17 female and 50 male**

Drop in-Centre Data tool Segregation Report

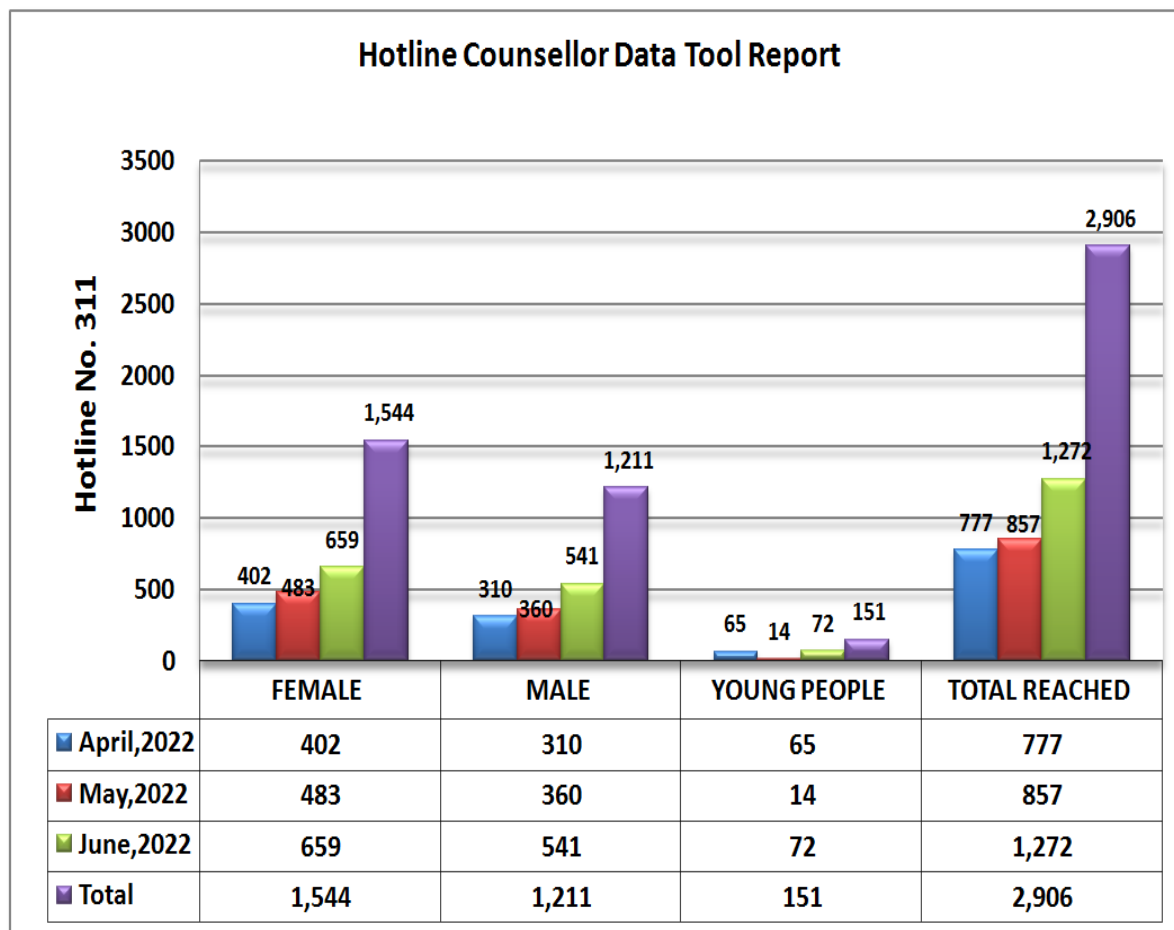

Activity.1.1.4 Free Hotline counsellor specialised telephone operating Service provided free line no. 311. Lastly the project will run the hotline currently registered with an existing number. The hotline will run with 3 counsellors to allow for expanded operating hours. Additional promotional activities will also be undertaken to promote the hotline services particularly in high priority settings such as ports, border crossing points, youth programs, IDP camps, urban settings etc. Outreach activities will also provide referral mechanisms to the hotline services. Services provided with include counselling, information, referral etc.

Hotline counselling centre is source of information service for all coverage in puntland, Somalia the service providing hotline counsellor through receiving calls and responding calls of information and refer callers to the services, The purpose of this hotline telephone is to create a platform of awareness about HIV prevention and Covid-19 awareness to provide up to date accurate information and counselling on HIV/Covid-19 and referral services the hotline currently running with three counsellors to allow for expanded operating hours. Additional promotional activities in high priority sittings such as IPDs camps urban setting and hot line telephone working properly and available very time through calls.

Hotline counsellors is effectively collaborating with the ORW/CMW workers in order to increase and referral though hotline no.311 after they give counselling, they record in every calls they receive after giving the client's needs and service provided.

The total reached Quarter two from April,May,June 2022 in all were reached 2,906 people both female male and young people the total Female 1,544 and Male 1,211 and young people were 151.

3. MEANS OF VERIFICATION, COORDINATION, MONITORING AND EVALUATION

Activity 1.1.5: Quarterly Supervision of KVP-PLHIV Peer educators in the regions such as for Bossaso,Gardo,Garoe, and Galkaio 25th May to 31st - May-2022

Quarterly field supervising in all regions of program implementation process is going on such as Bossaso-Bari, region Gardo-karkaar region, Garowe-Nugal region, Galkaio-Mudug region, field supervision is important to observe on their activities of community awareness the project coordinator or field officer they have the ability to monitor the quality of services of the community awareness of HIV/AIDS provided either were reached properly or not or data tool report were fake result of evaluation of their collective information, data tool report forms, and other data from the periphery to feed into the implementation program activities. The concept of supervision has evolved of supervising regional peer educators to supervise on their field visited workers to audit performance of Data tools individual contact their supervisory activities were primarily administrative,

Quarter two supervision overview supportive supervision is a process that promotes quality at all levels of the regional peer educators working in the fields' collection data tool report strengthening relationships within the system. ORW/CMW Supportive supervision is a process of guiding, monitoring,

ORW/CMW supportive supervision guidelines similarly describe supportive supervision as a process which promotes quality outcomes by strengthening communication, identifying and solving problem, facilitating team work, and providing leadership and support to empower health providers to monitor and improve their own performance. Supportive supervision involves directing and supporting to the team Outreach workers and Case management workers in order to enhance their skills, knowledge and abilities with the goal of improving health outcomes for the patients they manage. It is an ongoing relationship with the society and even their clients focusing on the identification and resolution of problems, optimizing the allocation of resources, Quarter two of 2022 will be focusing and Tracking referral form and evaluating of their Performance of how many they make referrals and tested in each four regions such as Bossaso, Gardo, Garowe, Galkaio. Data Quality Assessment checking during field supervision and discussion with the team for correction and some key areas needed of target group to be improved as data tool report through awareness we observe and verify of the process of the accuracy of the data tool individual contact the HIV prevention and case management project output/program through field visits to the organizations that submitted the forms and checking the quality of raw data kept by the reporting organization by examining the daily records used to complete the output monitoring form for a specific reporting period monitoring forms Comparing the output monitoring form 10 data tool individual contact Involves both verifying that appropriate data management systems are in place and the quality of reported data, for key indicators. HIV prevention and care management project in Puntland under with ISDP ORG working closely with MOH and PAC commissioners, and Daryeel network also contributes to the large goals and indicators of this HIV prevention and care project 2021-2023.

Activity 2.1.1 Quarterly Nutritional Support PLHIV clients

HIV Prevention and Care management Project 2021-2023 will be supporting PLHIV clients and providing Quarterly Nutritional support of people living with HIV/AIDS clients with registered regional ART Centres in Puntland Somalia and the ART centres categorised with selection according to four categories **such as: 1- Clinical Determined by ART doctor, 2- Pregnant/lactating Mothers, 3-Household with children having lost one or both of their parents, 4-Elderly or Disabled HIV positive. Only above mentioned 4 categories is allowed to receive of quarterly Nutritional support Bossaso Art, Gardo Art, Garowe Art, and Galkaio Art centres in Puntland.**

People living with HIV which malnutrition's status measurements can be provided data for clinical staging and can be identify they type of patients of high malnutrition whose health status my benefit from the nutritional support per quarter of data tool reporting of PLHIV clients of malnutrition status of clients with the regional ART Centre of recommending according to category selection of PLHIV clients which is undernourished, information to assess the impact of their needs , GF HIV prevention and care management programme to provide malnutrition of people living with HIV and track program nutrition interventions are improving PLHIV nourished clients status, Selection under process with the regional ART centres sorting out the most vulnerable of PLHIV malnutrition in each quarter randomly with selection of the client status from in all regions such as Bossaso ART Centre, Gardo ART Centre, Garowe ART Centre, Galkaio ART Centre, These designed with range of regional ART's reporting PHIV clients could not be the same in all regions according to number of their register as regional label.

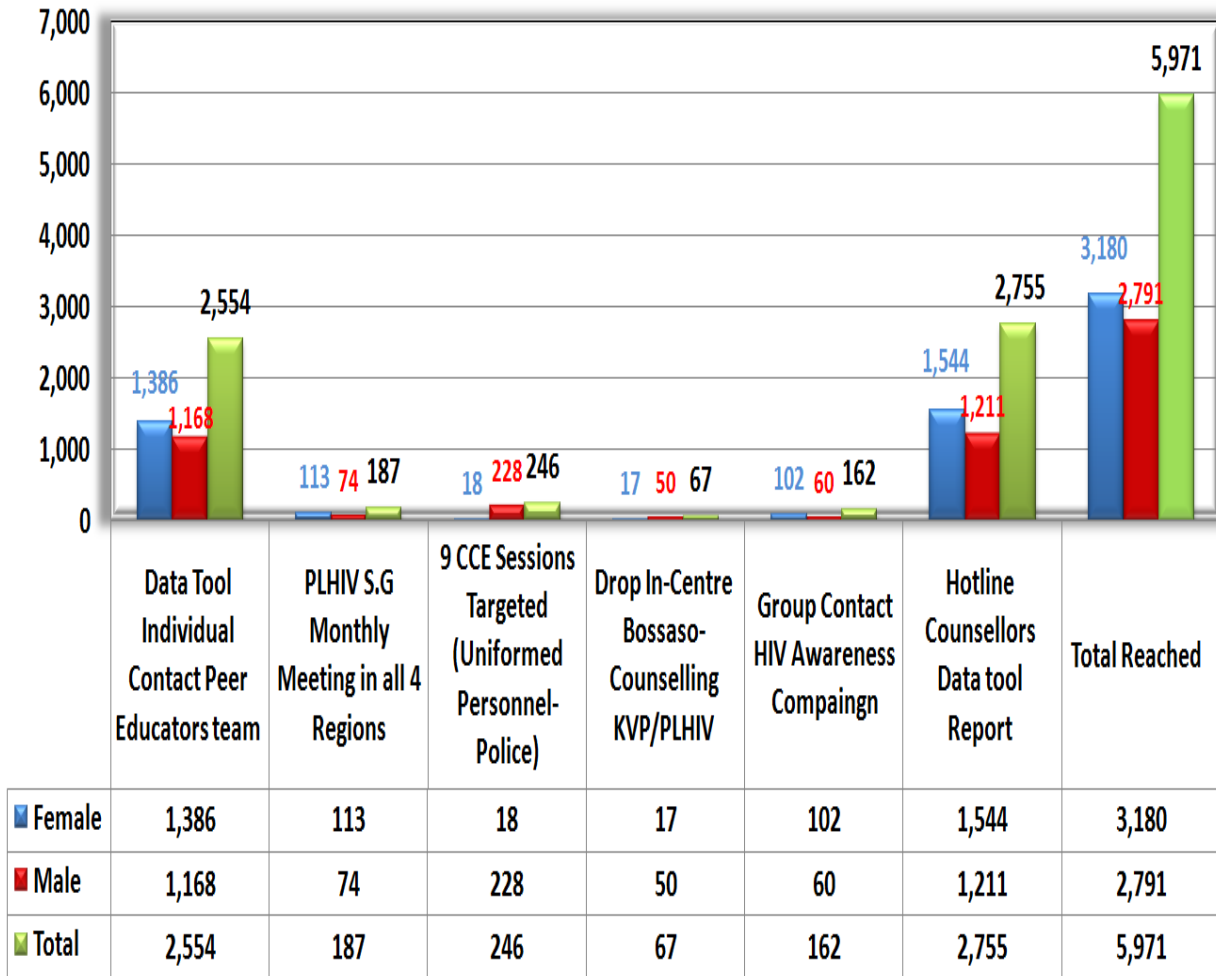

Unicef set standard procedure according to the PLHIV clients in each region the system of PLHIV clients in each region distributed of 100 malnutrition clients to receive money which is included of providing in each end of the quarter during implementation of this HIV Prevention and care project will be receiving Nutritional support money of \$40 dollar per client of 100 people living with HIV which malnutritions selected by the regional ART Doctors such as:

Bossaso 30 clients, Garowe 30 clients, Galkaio 30 clients, Gardo 10 clients, according to selection category of those 100 PLHIV clients registered selected Category one were choose 25 clients which clinical determined by the ART Centre, Category two were selected 21 clients which is pregnant/lactating mothers, Category 3 were selected 28 which is household with having children having lost one or both of their parents, also category 4 were selected 26 clients which is elderly or disabled HIV positive.

Activity 2.1.2. Quarterly Performance Incentive of peer educators:

Performance Incentives is a way of motivating the team members according to their commitment and their performance of work of their data tool report of doing extra ordinary work to be getting end of the quarter incentive performance money for encouragement are *four categories selection such as: Vulnerable Women of number referred and tested, Vulnerable men number referred and tested, PLHIV Case Management: number of LTFU lost follow up clients brought back into treatment, Facility Based PLHIV peers and number retained on treatment over the quarter (Mother mentors to focus on women and PLHIV PE on men),*This quarter two 2022 Performance Incentive comes from data tool report of defined indicators to be reaches target populations of result of data gathering and combining in total and result feedback which was collected from in regions ORW/CMW/MOTHER MENTOR/PEER ART/ of Peer educators selected from in all regions in Puntland Bossaso, Gardo, Garowe, Galkio of project implementation received **performance incentive received of 25 outreach workers and case management workers the total 14 female and 11 male with this quarter two which ended June 2022,**

QUARTER 2 IN ALL ACTIVITIES REACHED BOTH FEMALE AND MALE

5. PLANNED ACTIVITIES FOR NEXT QUARTER

Project Title:1: HIV prevention and care management in Somalia

OUTPUTS	ACTIVITIES	TARGET GROUP	Quarter 3 : 2022																			
			July-2022				August-2022				September-2022											
			W 1	W 2	W 3	W 4	W 1	W 2	W 3	W 4	W 1	W 2	W 3	W 4

6. IMPACT

HIV Preventions and care program 2021-2023 highly impact of reducing overall HIV spreading of HIV/AIDS in Puntland and supporting through outreach workers and casement team giving HIV Awareness in a new method of individual contact with different community

sectors such as elders, youth which are most at risk group and IDPS the key vulnerable population should be having concept knowledge about STI/HIV transmission and where they can get services provided if they are positive with ART centre.

This program supporting intervention through promoting HIV testing and counselling as well as to help people living with HIV avoid transmitting HIV to others through data tool individual contact to increase HIV/AIDS awareness and gather together the community members and with different society in all regions focussing and reaching of key vulnerable populations and most at risk population.

HIV Prevention and care management programme during interaction process of a targeting populations most at risk population also important to consider how different interventions interact with the society, and how they can most effectively be combined to reach the most-affected populations in a given area. During expanding HIV testing can amplify the impact of efforts to increase adherence to treatment, particularly in areas where large numbers of people remain undiagnosed.

The impact of this HIV Prevention project to give considerations of the target group to be reached and in order to assess the potential impact of the program of HIV/AIDS by the different ways of interventions in order to be reached with different sectors of community by reducing of HIV risk to the young generation which are most at risk population of HIV transmission.

The different Targets populations Coverage of this HIV Prevention and case management project needs to deal with their status such Prisons and Uniformed police is to deal their way of not directly approaching of telling about HIV awareness because they thing in a negative way during of HIV/AIDS awareness, increasing HTC mobilize team and post counselling sessions to be increase during implementation of this through MOH and PAC authorisation and capacitated training with peer educators,

Cultural perception of HIV/AIDS should be reduced community based intervention should be built and shared values and norms and social practice permitting culturally sensitive discussions of HIV and sexual and reproductive health such as homes, schools, universities etc.

- Drop in Centre Bossaso 25th, 26th June 2022 in-charge person office Bossaso on job trained Dic.
- Peer educators 31 ID CARDS ORW/CMW as they request to use as gatekeeper during community awareness.
- During Quarter 2 we Promoted Hotline no.311 and recorded call message of services provided by the hotline counsellor which is contributed by ISDP.
- ISDP contributed Brochures/leaflets 500pcs, of HIV awareness translated with Somali language,
- Hotline promotion A4stickers indicated in short message and service provides by hotline counselors to stick on in all MCHS, Schools, Pharmacies, ART centers, Public areas, tea shops, Stationeries, and etc to access hotline no.311 60pcs, A5stickers 200pcs, distributed in all four regions Bossaso, Gardo, Garowe and Galkaio also Drop in-centre Bossaso, Hotline office to give clients or any visitors who come in the office Dic and Hotline.
- Bossaso team ORW/CMW Referred and test almost 26 people and Garowe VCT center were referred 7 people Qardho, Galkaio still not yet.
- Conducted Quarterly HIV program supervision in all 4 regions
- Bossaso,Gardo,Garowe,Galkaio.

- 6th June in Gardo karkaar region with selection ART Doctor Mr Kalaay people living with HIV clients key vulnerable people Received 10 cards of CASH TRANSFER FROM WFP per month \$70 Dollar with continuation 7months.
- April 2022 in Gardo, karkaar region were distributed Food Aid through local government of sector of social affairs with 10 cards for complete FOOD AID.
- Quarterly supervision closely working with Daryeel network of empowering peer educators ORW/CMW also part of implementation process.
- Quarterly Performance Incentives receiving outreach workers and case management

7. CONSTRAINTS AND RECOMMENDATIONS

- ❖ Referral form record tracking of ORW/CMW enhancing of HIV TEST AND COUNSELLING.
- ❖ Drop in centre service should be authorised MOH and PAC to provide increased STI and post counselling and providing self-test kit or rapid test for those people who fail to reach with the ART Centre.
- ❖ The key gap of the program HIV prevention and case management implementation process through mass media and Radio program awareness
- ❖ Promote behaviour change at both individual level and public level through peer education for individuals at high risk and community/societal level through communication campaigns to change social norms and attitudes, which would in turn help reinforce safe behaviours at individual levels which needs time and funds to mobilize the community.
- ❖ behaviour change messages to specific audiences such as groups at high risk, men, women, young people address stigma involve motivated PLHIV, members of vulnerable groups in public information efforts
- ❖ Promote HIV/AIDS/STI programs, services and products.
- ❖ Evidence strongly suggests that irrespective of the stage of the epidemic, the most efficient method
- ❖ to reduce the spread of HIV (or any STI) in the general population is to reduce its transmission among groups at high risk. This targeted prevention approach.
- ❖ highest priority of stigma reduction and community mobilization can part take the misconception about HIV/AIDS,
- ❖ The stakeholders of the government should take action of Stigma Discrimination reduction about spreading about the rate of HIV in Somalia especially Puntland gov't to bring policies.
- ❖ Increase policies and procedures voluntary counselling and testing in all public and private sectors
- ❖ Income generation support for PLHIV clients will improve their social wellbeing and their psycho-social support and strengthening of health condition.
- ❖ Radio message awareness on HIV awareness.
- ❖ Billboards and posters illustrated of HIV/AIDS awareness
- ❖ To increase CCE Sessions in order to covered and reached a good number of receiving HIV/AIDS awareness.
