

Health Management Information Systems (HMIS) Training

3rd-5th Feb-2026.
(8:30am-4:00pm)

ISDP successfully conducted a 3-day Health Management Information System (HMIS) training in Bosaso, supported by the SHF Emergency Health and Nutrition Project. The training enhanced the capacity of 16 health workers from supported health centers and PHUs to effectively collect, analyze, and report health and nutrition data in line with national guidelines. Using a Training of Trainers approach, participants are now equipped to cascade knowledge and strengthen data management practices at their respective facilities. The training was conducted from 3rd to 5th February 2026, between 8:00 a.m. and 4:00 p.m.
